# Data sheet - Gas Handling Accessories

## Pipework Installation For Gases

Our engineers can provide this specialist service for you at your location. Gas installation is a specialist area and our staff have had years of gas industry applications, and with our membership of the British Compressed Gas Association, we can provide a quality and knowledgeable service for your application on your site.

We can also provide made up panels, control boards, valving arrangements etc made to your specification, for you or us to install.

This includes on site storage systems which include all cylinder securing hardware, regulators and pipework to the point of use. Lockable storage pens can be installed to safely house all the cylinders and regulators.

To physically handle, to secure, to safely use and to store gases a number of accessories are available from us;

- Cylinder trolley
- Storage racks
- Cylinder wall securing brackets
- Floor stands for cylinders
- Custom made racks or storage enclosures
- Cylinder connectors of all types eg BS, CGA or DIN
- Custom built panels

**Safety Executive " Pressure Systems Regulations " and all BCGA codes of practice .**
